

Helmets

No batteries to replace. Works on solar cells. No on/off switches - always on. ANSI Z87.1 approved. Maximum comfort headband. Push lock ratchet knob with five (5) different adjustment levels for the welder's personal requirement.

Eye-Tech 5-13 P/N 0700000890

Offers unlimited personal settings. The latest LCD-technology enables you to adjust from shade 5 to 13. The "grinding mode" (shade 4) can easily be activated from the outside. The Eye-Tech 5-13 can be used in all welding applications including oxy-gas welding.

- Infinitely variable in welding mode from shade 5 to 13. Grinding mode is shade 4
- Detection sensitivity can be adjusted
- Switching time from light to dark: 0.5ms at 131°F; 0.8ms at 72°F; 3ms at 23°F
- Dark to light delay can be adjusted from fast (0.1 - .35 sec.) to slow (0.3 - 0.6 sec.)
- Fully UV and IR protected up to shade 15
- Constructed of lightweight Zytel® (DuPont) non-flammable material. Weighs only 17 oz.

Scanorama P/N 14F00

- Fitted with a shade 5 large absorbing filter disc (150 x 175 mm)
- Filter disc provides large "window" which allows free sight around the filter plate and protects against light and heat rays
- Weight – 14 oz. (396 g)
- Ideally suited for Mig and Tig applications, up to 250 amps, using Argon shielding
- Helmet comes with large filter screen and filter plate each of shade 5. This gives a combined shade of 10. Order filter plate to get other shades
